

Services for those with disabilities

For the blind and visually impaired, the audiobook collection provides a selection of classic fiction and reading for pleasure, performed by well-known artists. Items in the collection are available for borrowing on cassettes or CDs. The loan period is 4 week, borrowing is free of charge. Our readout machine can be used to read out printed texts. The machine automatically recognises the orientation of the material inserted, and it would clearly read the text. The sound is similar to that of natural speech, the speed can be increased or lowered without changing the pitch.

The read text can also be saved. Signs with Braille text assist in finding one's way.

Those with reduced mobility are assisted by special workstations, lift access, while the hearing-impaired can avail of induction loops for the convenient use of the library.
